

Rife Lab Offboarding Checklist

June 30, 2025

The following checklist ensures all necessary steps are completed when a lab member departs.

- ☐ Organize your RifeLab GitHub repo into projects with a README.md file outlining the contents.
 - Ensure all code and data is accessible and has been uploaded to GitHub. Some services will become unavailable after your departure, so it is critical to upload materials to a location where they can be accessed.
 - Include a summary of all in incomplete projects and what you think are the next steps. Think of this as a guide for the next person who will pick up where you left off.
- ☐ Return all technology equipment to Trevor.
- ☐ Backup personal work and transfer data to the lab's shared drive.
- ☐ Submit final timesheets, expense reports, and reimbursements.
- ☐ Participate in exit interview with Trevor to discuss file organization, incomplete project summaries, and lab feedback.
- ☐ Provide forwarding physical and email address.
- ☐ Clean and organize your physical space (bench/desk/etc).
- ☐ Return all lab keys.
